Application/Control Number: 09/701,437

Art Unit: 1631

## **Drawings Notice**

Applicant is hereby notified that the required timing for the correction of drawings has changed. See the last 6 lines on the sheet which is attached to the back of the PTO-948, entitled "Attachment for PTO-948 (Rev. 03/01 or earlier)". Due to the above notification Applicant is required to submit drawing corrections within the time period set for responding to this Office action. Failure to respond to this requirement may result in abandonment of the instant application or a notice of a failure to fully respond to this Office action.

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23, drawn to a method of designing a compound.

Group II, claim(s) 24-29, drawn to a computer assisted method of compound identification.

Group III, claim(s) 30-35, drawn to a method of screening compounds.

Group IV, claim(s) 36, drawn to a compound capable of binding to a molecule of the EGF receptor family.-

Group V, claim(s) 37-45, drawn to a compound that possesses a specific stereochemistry and modulates activity.

Group VI, claim(s) 46-47, drawn to a pharmaceutical composition for preventing or treating a disease.

Group VII, claim(s) 48-53, drawn to a method of preventing or treating a disease.

Application/Control Number: 09/701,437

Art Unit: 1631

^, i

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is compound design. However Garret et al. (*Nature*, vol. 394, 1998) teaches crystal structures of an insulin-like growth factor receptor (IGF-IR) which "displays new architectural features that are common [...to] the EGF receptor family" (page 399, 1<sup>st</sup> column, 2<sup>nd</sup> paragraph). In knowing the architectural features, binding pockets are then known as well. It is commonly known in the art to design binding compounds based upon crystal structures. Thus the contribution over the above prior art, unity of invention does not exist between Groups I-VII.

In addition, the special technical features of Groups II-VII lack the same or corresponding special technical features: the special technical feature of Group II is compound identification with computer assistance; the special technical feature of Group III is screening compounds by tests and high throughput assays; the special technical feature of Group IV is a composition; the special technical feature of Group V is another composition possessing specific stereochemistry and modulating activity; the special technical feature of Group VI is a pharmaceutical composition; and the special technical feature of Group VII is a method of disease prevention or treatment. Thus each and every one of the groups listed above do not relate to a single general inventive concept due to the lack of the same special technical features.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Page 4

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Inquiries

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993) (See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703) 308-4242, or (703) 308-4028.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monika B. Sheinberg, whose telephone number is (703) 306-0511. The examiner can normally be reached on Monday-Friday from 9 A.M. to 5 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, Ph.D., can be reached on (703) 308-4028.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to Patent Analyst, Tina Plunkett, whose telephone number is (703) 305-3524, or to the Technical Center receptionist whose telephone number is (703) 308-0196.
